MULTIPLE AWARD-WINNER AND FREE OF HAZARDOUS SUBSTANCES: PICOFILM O-60 WHITE XM1

PICOFILM O-60 white XM1 from the FACESTOCK product range by Sihl has not only been approved seven times to BS5609 Section 3, but is also free of the hazardous substances indicated in the SVHC list (as of July 2021).

Transporting goods by sea means covering long distances, often in extreme weather conditions. Labels are thereby used to reliably identify goods of all categories, including hazardous substances and toxic chemicals according to the GHS.

Approval according to the internationally recognised standard BS5609 Section 3 guarantees reliable and resilient labelling in the selected printing process for this type of application. We are delighted that **PICOFILM O-60 WHITE XM1** from the FACESTOCK product range by Sihl is certified for seven different inkjet printers or printheads (Epson (3x), Primera, Swift, HP PageWide, Afinia). The resilient surface is supplied with a white, robust film.

The product is also free of hazardous substances and features an optimum thickness that allows more labels to be printed on one reel as compared to other matt inkjet films. The benefits: higher productivity thanks to fewer reel changes and environmental friendliness thanks to a very low use of plastics.

Detailed information about FACESTOCK can be found here: www.sihl.com/en/facestock/.

This is what
defines us

Sihl is a strong partner for future-orientated industries and creates innovative solutions with its premium coatings.

With more than 350 employees in the Sihl Group, we contribute to the success of our customers from a wide range of industries in almost every country in the world.

From automotive and tourism, from packaging and labels through to printing and logistics, our customers trust our premium coatings and technological expertise. As a specialist for future-proof products, Sihl lays the foundations for innovative trends and promotes sustainable results. In short, Sihl is simply the better solution!
