

PRESSURETAC

Luggage labels

PRESSURETAC – the simplest solution for baggage tags

PRESSURETAC loop tags for luggage are the first choice when a self-explanatory, easy to use baggage tag is desired: for labelling of baggage in the Self Check-in process at airports, as well as at train stations, hotels or other locations of luggage storage.

The PRESSURETAC-cold-seal adhesive only sticks to itself – incorrect application is impossible. The special coating does not require a release liner and it can be removed from luggage without leaving residue – a clean, waste-free solution.

Loop around your object and press the ends together.

Smooth the ends out and you have your finished luggage label.

Special benefits:

- > Only sticks to the another the opposite coated side – no release liner required
- > Self-explanatory and secure – incorrect application is impossible
- > Residue-free removal – leaves no trace on luggage
- > Reduced risk of accidents due to residue-free labelling, no slippery release liners to drop on the floor
- > PRESSURETAC is patented and has been successfully operating in airports around the world for many years in Self check-in machines
